

Mechanical Maintenance Cover Letter

765 Sammy PointsLawerencefort, IA 20514-8590

Dear Casey Hessel,

In response to your job posting for mechanical maintenance, I am including this letter and my resume for your review.

Previously, I was responsible for strategy and support for maintenance issues including maintenance programs (predictive, preventive), development of tools and resources, personnel selection, training and development.

Please consider my qualifications and experience:

- SAP system or similar application for CMMS
- Extensive maintenance planning experience within the Oil and Gas Industry
- Working knowledge of CMMS or SAP
- Excellent leadership, management, problem solving, decision making and interpersonal skills
- Strong technical knowledge of materials, equipment design and function
- Exposure to various mechanical repairs and techniques preferred
- Previous experience facilitating outside shop work, , support activities
- Exceptionally strong communication skills, drive, sense of urgency and problem solving abilities will be critical for the success of the individual in this role

Thank you for your time and consideration.

Sincerely,

Shiloh Pagac
