

# Mental Health Specialist Cover Letter

3746 Marc Place  
Botsfordstad, DE 19434-6670

**Dear Hayden Emmerich,**

I submit this application to express my sincere interest in the mental health specialist position.

Previously, I was responsible for culturally appropriate and sensitive school-based mental health services in the forms of individual, group, and family treatment, therapeutic case management, crisis intervention, and consultation services as required by the student's IEP.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Communicate effectively orally and in writing, and write concise reports
- Peer counseling and motivational support techniques for helping behavioral health consumers
- The mental, physical, emotional, and social needs of consumers with mental health, physical health and/or substance abuse issues
- Principles and techniques of mental health treatment and recovery principles and practices
- The psychosocial aspects and characteristics of mental illness and severe emotional disturbance
- Principles of risk assessment, crisis intervention and treatment
- Harm reduction principles and practices
- Behavioral health programs, community organizations and resources, and peer support networks in the local community

**Thank you in advance for reviewing my candidacy for this position.**

Sincerely,

Armani Stanton
