

Middleware Administrator Cover Letter

87602 Renner RestMoorebury, WY 38038-0719

Dear Tatum Smith,

I would like to submit my application for the middleware administrator opening. Please accept this letter and the attached resume.

In the previous role, I was responsible for middleware administration duties for critical platforms, end-to-end, including WebSphere, jBoss, Tomcat, Apache, IBM HTTP Server, and WXS (extreme scale cache); Delivering middleware enterprise projects and regulatory legislative initiatives; Ensuring production stability from an ongoing support standpoint; Ensuring middleware platforms are patched with the most current version of software, helping to manage risk to the customer; Providing WebSphere Application Server administration that includes server installation, configuration, performance tuning and production support;.

Please consider my experience and qualifications for this position:

- Work with the team and escalate things as and when needed
- Work independently and a quick learner
- Understanding of ESQL programming
- Production support 24/7 on a rotation basis
- Experience with DR exercises
- Strong experience in setting up continuous delivery and deployment pipeline using Jenkins and administering release management of various ongoing release
- Demonstrated track record of learning new applications or computer languages including the use of source control
- Client-centred attitude, and autonomy

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Phoenix Kiehn
