# Middleware Administrator Cover Letter

937 Malia GatewayEast Napoleon, ME 39086-8447

**Dear Sam Runte,**

In response to your job posting for middleware administrator, I am including this letter and my resume for your review.

In my previous role, I was responsible for design team basic scripting capabilities in SKILL, PERL, Ocean, Linux Shell, etc.

Please consider my qualifications and experience:

- Minimum 3 supporting enterprise monitoring technologies
- A demonstrated track record of quickly learning and using new applications or computer languages including the use of source control
- Leadership, execution, communication, innovation and development
- Capacity to analyze priorities in conflict
- Good relationships
- Strong experience with multiple tool sets within the Software AG product suite, including Integration Server, CentraSite, Mediator, ActiveTransfer, Trading Networks, and Universal Messaging
- Experience in administration, design, implementation of Integration processes and systems in a high volume, complex multi-source/target environment
- Excellent written and oral communication skills, both with customers, technical team members, and other technical contributors across the organization

**Thank you in advance for reviewing my candidacy for this position.**

Sincerely,

Dallas Rau
