

Middleware Administrator Cover Letter

2302 Alberto LakeDianview, AZ 53071-7754

Dear Ari Schulist,

Please consider me for the middleware administrator opportunity. I am including my resume that lists my qualifications and experience.

Previously, I was responsible for on-going administration support of Linux/Windows Operating Server system.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience with command line use on AIX and Linux servers
- Expert on Incident Management & Problem Management techniques
- Well experienced in setting up Development, Testing, Staging and Production environments
- Efficiently configured and setup Secure Sockets Layers (SSL) for data encryption and client authentication
- Good experience in planning, installation and administration of WebSphere MQ on various platforms like AIX, Red Hat Linux and Windows XP/2K
- Expert in deploying J2EE applications on WAS 5.x/6.x/7.x/8.x versions using WAS admin console and wsadmin scripting tool
- Experience in creating, configuring and administrating profiles, nodes, node agents and node groups for WebSphere Application Server
- Configuring WebSphere Application Server on multiple platforms for both horizontal and vertical scaling for workload Management through deployment manager for load balancing and fail over functions

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Marion Reilly
