

Modeling Analyst Cover Letter

423 Predovic Trafficway
Ziemannview, LA 45104

Dear Emerson Hodkiewicz,

I submit this application to express my sincere interest in the modeling analyst position.

In my previous role, I was responsible for ad-hoc analysis/queries/reports from a wide variety of BI tools including MicroStrategy, OBIEE, Oracle data-mart tables, etc.

My experience is an excellent fit for the list of requirements in this job:

- Experience working with various database architectures such as SQL, DB2, or other relational databases and relational database programming
- Quantitative analytical background with experience in applied statistics, data mining, or computer science is preferred
- Experience with statistical modeling software is preferred
- Prefer experience in compliance including knowledge and understanding of anti-money laundering acts, laws and regulations anti-money laundering issues and trends
- Hands-on experience with databases including writing SQL queries and creating objects
- Excellent communication and presentations skills including visualizing and summarizing key results
- Proficiency with databases and SQL (Microsoft SQL Server preferred)
- Working knowledge of the USGBC's LEED certification rating systems (NC, EB, CI,), with direct experience in producing documentation for the EA Credits and Prerequisites

Thank you for your time and consideration.

Sincerely,

Ari Senger
