NASA Cover Letter

361 Lang VistaLatinabury, KY 05371

Dear River Sipes,

I submit this application to express my sincere interest in the NASA position.

In my previous role, I was responsible for expertise in the application of system safety and reliability analyses in support of NASA's human spaceflight programs including, but not limited to, the Commercial Crew, Orion Multipurpose Crewed Vehicle, and Gateway Programs.

Please consider my experience and qualifications for this position:

- Experience with software simulation
- Experience developing software using C, C++, C#, or Java
- May provide mentorship of other, more junior team members
- Gaining an understanding of NASA requirements and the application of NASA security requirements within the current cyber landscape
- Coordination and managing high school interns engaged in support of SSO during the summer months
- Other Information Assurance and SSO functions as assigned
- Currently enrolled in Cybersecurity related courses or have other experience or pursuing certifications in the Cybersecurity domain
- Familiarity with requirements of business continuity, operations security, cryptography, forensics, regulatory compliance, internal counter-espionage (insider threat detection and mitigation), physical security analysis (including facilities analysis), and security management

Thank you for taking your time to review my application.

Sincerely,

Tatum Champlin
