

NASA Cover Letter

325 Brakus HarborsEast Clairmouth, IL 43711-8577

Dear Emerson Donnelly,

In response to your job posting for NASA, I am including this letter and my resume for your review.

Previously, I was responsible for technical integration with other engineering disciplines, SLS Elements, and Exploration Ground Systems (EGS).

Please consider my experience and qualifications for this position:

- Demonstrated access to key NASA IT government customers and industry partners
- Prior experience supporting business development and capture efforts for NASA
- Strong, respected relationships within NASA IT community
- Previous working experience with NASA or other Cyber based Federal agencies
- Highly prefer a prior Public Trust/NACI or Secret/Top Secret Clearance
- Preferred Certifications such as CISSP, GCIA, CEH, GCIH, GCFA or CSIH
- Software hazard analysis and risk assessment in conjunction with the development of a system reference model
- Perform NASA independent testing on missions such as, but not limited to NASA Human Exploration Operations (HEO) missions

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Emery Kertzmann
