

# **.NET Technical Lead Cover Letter**

905 Morar CampEast Christenchester, WV 23355

**Dear Tyler MacGyver,**

In response to your job posting for .NET technical lead, I am including this letter and my resume for your review.

Previously, I was responsible for architectural direction for a .NET/ASP.NET web application.

Please consider my experience and qualifications for this position:

- Extensive experience with Web technologies like ASP.NET, WCF, Web Services and Web API
- Excellent Knowledge of WCF (Windows Communication Foundation) for development and hosting
- Experience in all stages of SDLC involving studying of the user requirements, analyzing, designing, coding, implementation, debugging, unit testing, and deployment
- Experience in the Insurance domain is an added advantage
- Good project status reporting to the stake holders
- Experienced with data access techniques, ORM technologies / best practices
- Experienced with source control systems (CVS, Subversion, Perforce)
- Experienced with web application development (AJAX, ASP.NET, JavaScript, and CSS)

**Thank you in advance for reviewing my candidacy for this position.**

Sincerely,

Blake Kessler
