

Network Development Cover Letter

3246 Art PortSouth Barton, AK 72030

Dear Frankie Emard,

I submit this application to express my sincere interest in the network development position.

In my previous role, I was responsible for engineering solutions to complex network problems with regards to TDM and Optical Packet equipment in the Frontier network.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Good wireless and cellular technical knowledge, with exposure to topics like MIMO, beamforming, fronthaul, and OTA testing
- Strong Keysight and/or competitive product familiarity
- Track record of successful leadership, results growth, and autonomous behaviour
- Senior Physician Recruitment and Development professional with a proven track record of record and aligning physicians/and physician executives with Healthcare organizations
- Excellent organizational capabilities and good attention to detail
- Demonstrated understanding of medical manpower planning and the requirements of each individual market and / or specialty
- Experience establishing new markets including the development of the strategy and oversight of the implementation
- Uptime solution knowledge

Thank you for considering me to become a member of your team.

Sincerely,

Robin Monahan
