

Node JS Developer Cover Letter

39173 Abshire CliffsJanville, CO 56687

Dear Royal Bechtelar,

In response to your job posting for node JS developer, I am including this letter and my resume for your review.

Previously, I was responsible for familiarity with front-end web frameworks (Angular, React, etc.) and the Linux environment.

Please consider my experience and qualifications for this position:

- Solid foundation in an enterprise language such as C#, Java, or VB development
- Experience with SQL (any flavor)
- Should have the skillset of CloudFormation, AWS, Node.js, Java 8, Spring Boot, HTML5 / CSS3, AngularJS, Bootstrap
- Review the Business Requirements for upcoming projects and build Business Domain Driven Reusable Microservices with API Management Solution using Microservices Design Patterns
- Design and Development Efforts, as a part of the Agile team
- Maintain Release Notes by documenting new services, fixes and setup configuration details
- Strong proven experience with Node.JS and Express
- Strong proficiency working with RDMS and NoSQL data stores

Thank you for your time and consideration.

Sincerely,

Frankie Douglas
