

Node JS Developer Cover Letter

264 Nolan ParksLake Novaburgh, MN 70856-3018

Dear Greer Corwin,

I submit this application to express my sincere interest in the node JS developer position.

In my previous role, I was responsible for technical solutions for any design changes across the applications and come up with proof of concepts if required.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience with implementing run-time architecture services (caching, logging)
- Experience working in Azure Cloud Environment is a bonus
- Preferred experience with React and/or Redux
- Experience in using different cache technique, CDN, Redis, Memcached
- Working experience using GitLab, Jenkins, and similar tools and technologies
- Excellent business ethics in always dependable and conduct oneself in a professional manner
- Experience developing web-based user interface for business applications
- Expert level understanding of the systems development life cycle

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Lennon Wilderman
