

# Node JS Developer Cover Letter

73680 Gleichner GreensWest Raymond, WY 37631-1041

**Dear Ryan MacGyver,**

In response to your job posting for node JS developer, I am including this letter and my resume for your review.

In my previous role, I was responsible for recommendations and develop engineering designs and project plans for cloud migration, cloud operation, and cloud IT optimization.

Please consider my qualifications and experience:

- Experience with async code
- Experience building scalable, enterprise-level technology stacks
- Experience with any database, SQL and/or NoSQL
- Knowledge of building scalable web applications
- High aptitude for diving in, taking ownership and picking up new things
- Collaborate with Front-end team and WMS team to understand requirements and resolve issues
- Experience/Knowledge in React JS and Cloud (AWS/Azure/Google Cloud)
- Experience in application performance tuning and troubleshooting of issues

**Thank you for considering me to become a member of your team.**

Sincerely,

Robin Fisher
