

Oncology Manager Cover Letter

690 Waters Court West Simonville, NM 59442

Dear Ryan Rodriguez,

I am excited to be applying for the position of oncology manager. Please accept this letter and the attached resume as my interest in this position.

In my previous role, I was responsible for leadership and oversight for key analytics functions regarding clinical program management, managed care and government-based value-based care programs (e.g., Oncology Care Model).

Please consider my experience and qualifications for this position:

- Facilitate the prioritization of requests for Research Oncology's input through a robust understanding of all of our ongoing projects
- Ensure that all Research Oncologists are always well prepared for any conference/speaking engagements
- Contribute to the organization, synthesis and cross-team communication of Research Oncologist-led projects
- Build strong internal relationships across the organization
- Support recruiting efforts for Research Oncology
- Targeted lung cancer therapy experience (highly preferred) or other targeted therapy experience
- Experience with new product launches, and marketing and development of digital patient services
- Outside thinking rather than inside focus

Thank you for taking your time to review my application.

Sincerely,

Sutton Mohr
