

Operational Engineer Cover Letter

193 Reilly TurnpikeChanelleside, NE 86227

Dear Landry Klocko,

I submit this application to express my sincere interest in the operational engineer position.

In my previous role, I was responsible for technical leadership in projects and other initiatives impacting the Systems, Networks and Telecom team when needed.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Computer Literacy (MS Office and relevant Rock Engineering Packages)
- The Mine Health and Safety Act
- Minerals and Energy Act
- Knowledge of Anglo Coal South Africa Operational and Rock Engineering Codes of Practices, policies and procedures (added advantage)
- Basic understanding of the risk assessment process
- Solid understanding of distributed computing techniques
- Knowledge and understanding of operating with data in large scale
- Proficient in Linux / Unix environments

Thank you for your time and consideration.

Sincerely,

Denver Kub
