

Operational Engineer Cover Letter

6831 Ankunding PlainsLake Karey, DE 76133

Dear Dakota Frami,

I submit this application to express my sincere interest in the operational engineer position.

In the previous role, I was responsible for ongoing coaching and training to Plant Operations and Technicians to improve plant proficiency in the use of Control Systems Networks Manufacturing Systems Applications, Distributed Control Systems, and Human Machine Interfaces (HMI's).

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Enjoy working on loosely defined problems
- Proficient in data extraction methods
- Proficient in a scripting language such as Python, Perl or shell
- Experience with SQL and data extraction from Oracle databases
- Experience with NoSQL data extraction from HBase, Cassandra, MongoDB
- Able to select technological solutions based on problem statements
- In-depth knowledge of development tools, application frameworks, and testing tools
- Knowledge of OSS applications and software

Thank you for considering me to become a member of your team.

Sincerely,

Casey Fay
