Oracle Cloud Cover Letter

5855 Bauch TraceLake Guadalupe, OK 50176-6737

Dear Shiloh Orn,

I would like to submit my application for the oracle cloud opening. Please accept this letter and the attached resume.

Previously, I was responsible for technical expertise to Data Warehouse implementation teams and interface with the industry vendors for technical support as needed.

My experience is an excellent fit for the list of requirements in this job:

- Develop and maintain security architecture artefacts (e.g., models, templates, standards and procedures) that can be used to leverage security capabilities in projects and operations
- Contribute at proposal and design project phases from a Security Architecture perspective
- Scoping and designing Secure Architectures
- Conduct Security Assessments on Architecture design
- Participate in key projects in order to independently assess the risks and ensure appropriate risk mitigation has been taken
- Responsibility for the Security Testing of projects
- Coordinate with Development and CloudOps teams to advocate secure coding practices, and to escalate concerns related to poor coding practices to the Lead Security Architect
- Support the development of security strategy plans and roadmaps for internal and external clients based on sound enterprise architecture practices

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Finley Mann
