

# Project Management Engineer Cover Letter

541 Lacey LakesAnnabelltown, WY 23910-1114

**Dear Peyton Kulas,**

In response to your job posting for project management engineer, I am including this letter and my resume for your review.

In my previous role, I was responsible for guidance to team on risk management, regulatory and quality engineering policies, principles and best practices.

My experience is an excellent fit for the list of requirements in this job:

- A sound knowledge of hydrological analysis and/or fluvial or coastal hydraulic modelling packages
- Experience in working on drainage, sewerage or related water projects with utility companies would be advantageous
- An interest in working with a diverse range of UK and Irish clients
- Basic Understanding of EVM
- Systems Integration experience and knowledge of space ground systems
- Experience supporting prior Operations and Maintenance Modifications or Studies
- Extensive SBIRS, JTAGS, DSP, or S2E2 customer and Lockheed Martin contacts
- EVM/CAM training preferred

**Thank you for considering me to become a member of your team.**

Sincerely,

Briar Cole
