

# Public Health Analyst Cover Letter

87116 Volkman Shores Simonisview, PA 29155-2726

**Dear Emerson Lynch,**

In response to your job posting for public health analyst, I am including this letter and my resume for your review.

Previously, I was responsible for opportunities and guidance to students seeking to publish research articles and public health communications across multiple platforms.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience in an applied health care delivery, health policy, public health, or related setting
- Strong academic record with a history of innovation or excellence in an applied work setting
- Demonstrated coordination, project management or program management skills
- Experience managing outreach, communication and/or educational activities
- Able to synthesize content and summarize technical reports for government or other official use
- BA/BS in Public Health, Public Policy, Biology, Sociology or other related social science field
- Demonstrated knowledge of quantitative and qualitative research experience or completed coursework
- Demonstrated clinical experience supporting modules of the Cerner EHR Solution

**Thank you in advance for taking the time to read my cover letter and to review my resume.**

Sincerely,
