

QA Intern Cover Letter

8772 Hills ShoalsHicklevan, TN 73894

Dear Armani Ritchie,

I submit this application to express my sincere interest in the QA intern position.

In my previous role, I was responsible for overarching architecture, vendor strategy, account management, networking, and other practices and patterns to ensure the success of project teams' deployments for multiple cloud providers.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Atlassian suite (Jira, Stash, Bamboo and HipChat) familiarity
- Experience with VMware ESXi and the vSphere client for creating and cloning virtual machines used for testing
- Experience with Windows administration, including SCCM and AD configuration and administration
- Students pursuing BS, MS in Computer engineering, Mechanical or Electrical engineering
- Knowledge and experience with computer applications, networking and programming
- Mechanical/Electrical engineering undergrads preferred
- Familiarity with modern trends in smartphone technology
- Interest in coding languages (C, C++, Java...)

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Cameron Kuhlman
