

QA / QC Engineer Cover Letter

259 Tashia WellsKelvinburgh, NC 61866

Dear Avery Hickle,

In response to your job posting for QA / QC engineer, I am including this letter and my resume for your review.

Previously, I was responsible for information to the QA Lead to support the construction of detailed Test Plans for all testing phases.

Please consider my qualifications and experience:

- Communication skills demonstrating resolution of situations through compromise and negotiation
- Understanding the role of quality and the work of a Welding QA/QC Engineer
- Craft Apprenticeship
- City & Guilds in Fabrication/Engineering Discipline or equivalent
- Radiation Worker and Confined Space entry
- NSQAC desirable
- BS in industrial, quality, chemical or mechanical engineering or demonstrate equivalent work experience in the Quality Engineering area or Bachelors in Scientific Discipline or related field
- Should have worked in the role of Quality Control Engineer or equivalent for completed Civil Infrastructure assignments for atleast 5 projects

Thank you for considering me to become a member of your team.

Sincerely,

Rory Weissnat
