

Research Associate / Senior Associate Cover Letter

675 Andrea KnollWeissnattown, WV 10329-4275

Dear Emery Morissette,

Please consider me for the research associate / senior associate opportunity. I am including my resume that lists my qualifications and experience.

Previously, I was responsible for direct scientific and technical contribution (experimental design, data analysis, interpretation of results) to pre-clinical and clinical biomarkers research in ID projects based on your expertise in omics methodologies, in particular genomics and genetics.

Please consider my experience and qualifications for this position:

- Demonstrated experience with laboratory and molecular biology techniques such as nucleic acid purification, DNA cloning, PCR, NGS library preparation and sequencing
- Demonstrated understanding of how scientific principles apply to problem being studied
- Experience troubleshooting problems, conducting analysis of data and recording experimental data
- Experience in sequence data analysis/ interpretation
- Knowledge in gene expression, epigenetic regulations and plant genomics
- Knowledge of Environmental, Health and Safety, Security, Procurement and business management policies and procedures
- Experience with lab automation and data management
- Experience mentoring research technicians and students

Thank you for taking your time to review my application.

Sincerely,

Peyton Stehr
