

Research & Development Intern Cover Letter

669 Helaine Causeway Rempelchester, SC 54527-2707

Dear Lennon Batz,

In response to your job posting for research & development intern, I am including this letter and my resume for your review.

Previously, I was responsible for project leadership for mixed-signal audio products by working with multi-functional silicon development teams to meet internal and customer commitments.

Please consider my experience and qualifications for this position:

- Experience in chemical and/or mechanical lab testing
- Familiarity with Microsoft Office and its data analysis & reporting tools, MatLab, Minitab
- Software programming experience preferred
- Hands-on laboratory experience, including use of analytical equipment
- Knowledge on protein chemistry, biochemistry and/or instrument analysis
- Good analytical thinking and communication skills
- Currently pursuing a M.S
- Excellent knowledge of ROS

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Casey McLaughlin
