

Research & Development Intern Cover Letter

917 Melaine BurgsTwandabury, UT 35616-6816

Dear Briar Schuster,

I submit this application to express my sincere interest in the research & development intern position.

Previously, I was responsible for the needed administrative support to ensure effective and efficient meetings including necessary materials, audio visuals, etc.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Bachelors of Science in Biology or a related field
- Experience in signal processing and algorithm development for biomedical applications
- Experience in programming in scripting languages, such as MATLAB, Python or R for prototyping, testing and validation of signal processing algorithms
- Experience in Control Engineering to develop and design of closed loop control systems
- Knowledge in front-end signal conditioning electronic circuits for various sensors for biomedical applications
- Some practical experience in machine learning algorithms
- Good documentation of work results
- Available for part-time for the duration of the assignment

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Campbell Rippin
