

# Research & Development Intern Cover Letter

80106 Greenfelder IsleNorth Myron, MN 73760-1622

**Dear Azariah Hill,**

In response to your job posting for research & development intern, I am including this letter and my resume for your review.

Previously, I was responsible for technical support in the development and dissemination of tools, materials, reports, papers, web content, and presentations.

Please consider my qualifications and experience:

- Currently enrolled in a graduate program OR PhD with a focus on Biochemistry
- Become proficient in testing capabilities associated with technology
- Familiar with engineering software including MATHCAD, TK Solver or other
- Strong interest in developing therapeutics to treat medical needs
- Interest in quantitative models of valuation
- Experience with databases and data processing is an advantage
- Students with a background in computer science, electronics or cybernetics
- Students with basic knowledge of real time operating systems like VxWorks or Linux, C/C++, source control systems

**Thank you in advance for taking the time to read my cover letter and to review my resume.**

Sincerely,

Ari Blanda
