

# Research Engineer Cover Letter

90346 Muller LightNew Everettton, MT 12031-8273

**Dear Landry Schimmel,**

Please consider me for the research engineer opportunity. I am including my resume that lists my qualifications and experience.

Previously, I was responsible for advanced Python development expertise as a key member of a specialized science-based team focused on the research and development of Manhattan Associates' next generation cloud-native Machine Learning platform.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Provide subject matter expertise in an area of engineering design
- Knowledge and experience with mechanical design and engineering, including materials selection
- Prepare & present technical papers externally, and properly document all technical learning internally (CRI's)
- Proactively drive & secure intellectual property including invention disclosures, case filings, and office actions
- Utilize six-sigma disciplines to structure projects and make sound engineering decisions based on data
- Interface with other MS&E leaders and focal points to promote continuous improvement of engineering disciplines, communication, and teamwork
- Experience in mechanical product design and engineering preferred
- Experience leading projects through the complete product development cycle

**I really appreciate you taking the time to review my application for the position of research engineer.**

Sincerely,
