

Research Engineer Cover Letter

560 Crist SpursTuvile, UT 25621

Dear Gray Berge,

I submit this application to express my sincere interest in the research engineer position.

In the previous role, I was responsible for thought leadership and identify new areas where advanced machine learning methods can improve product performance and member experience.

My experience is an excellent fit for the list of requirements in this job:

- Consistent track record of innovation in creating novel algorithms and advancing the state of the art
- Understanding of Computer Graphics demonstrated through course work and/or projects
- GPU architecture knowledge and/or workload and performance characteristics
- Performance analysis using low-level tools
- Video game development, rendering software or visual effects in film
- Writing, publication, presentations at events/conferences
- Demonstrated skills and experience programming in Python and other scripting languages
- Excellent knowledge and experience with router and switch configuration and operation

Thank you for considering me to become a member of your team.

Sincerely,

Corey Greenfelder
