

Research Manager Cover Letter

3653 Deon ParkWest Ashlistad, NH 45922-8772

Dear Cameron Lehner,

In response to your job posting for research manager, I am including this letter and my resume for your review.

Previously, I was responsible for strong leadership in the development, implementation and improvement of clinical trial management and patient population screening tools/systems.

Please consider my qualifications and experience:

- The opportunity to join and create talented teams of problem-solvers
- Work-life balance and Inclusion & Diversity Programs
- Experience in supervision of staff including coaching and professional development
- Previous experience working for a National Lab, particularly a DOE lab
- Experience with higher education assessment of student learning or program evaluation
- Experience with Skyfactor products strongly preferred
- Advanced knowledge of research methods and data management – quantitative and qualitative methods, descriptive and inferential statistical analyses, predictive analytics, data structures, results interpretation, research ethics, and research documentation
- Advanced knowledge of higher education – standard data definitions, student learning and development theories, assessment methods, retention strategies, and the organization and activities of colleges and universities

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Baylor Lowe
