

Research Senior Manager Cover Letter

6762 Boris Garden New Gerard, PA 36025

Dear Gray Klein,

I submit this application to express my sincere interest in the research senior manager position.

Previously, I was responsible for high-level oversight of the entire portfolio of translational research and early biomarker efforts in Merck-sponsored oncology studies.

Please consider my qualifications and experience:

- Solid understanding of research frameworks, requirements, and tools across both qualitative and quantitative research techniques univariate and multivariate analytical techniques used in market research (e.g., regression, cluster analysis, conjoint analysis, factor analysis, survey design)
- Knowledge of statistics and survey software
- Experience with design, implementation, and analysis of quantitative and qualitative research studies
- Quantitative and qualitative research skills and experience
- Experience working with government and local partners and institutions to influence program and policy change and develop capacity to conduct and use research
- In-country/resident experience in Mozambique highly desirable
- Willingness to travel both in-country, and internationally as needed
- Experience with project management, including setting schedules and delivering to those schedules preferred

Thank you for your time and consideration.

Sincerely,

Haven Wolf
