

Safety Scientist Cover Letter

1043 Harber Path Schuppefort, AL 13665

Dear Max Rogahn,

Please consider me for the safety scientist opportunity. I am including my resume that lists my qualifications and experience.

In my previous role, I was responsible for medical expertise and objective safety oversight to ensure patient safety throughout the product lifecycle across the business unit, including product development processes, risk management, clinical trials, post-market safety surveillance, and field actions.

Please consider my qualifications and experience:

- Experience working in regulated environments and with internal systems quality policies and procedures
- Knowledge or experience of using mechanistic information in toxicology risk-based decision making
- Evidence of a creative, problem-solving mindset
- Good awareness of novel pathways approaches to safety assessment and their potential application for decision-making OR experience in traditional approaches to toxicological risk assessment
- PV processing experience should include drugs
- Excellent attention to detail and accuracy and maintain consistently high quality standards
- Excellent written and verbal communication and report writing skills
- Experience developing and implementing statistical programming standards and tools that enable efficient aggregate safety evaluation

I really appreciate you taking the time to review my application for the position of safety scientist.

Sincerely,

Armani Goyette
