

SAP Business Intelligence Cover Letter

978 Rutherford PortJacobishire, SC 70046-0991

Dear River Schoen,

In response to your job posting for SAP business intelligence, I am including this letter and my resume for your review.

In my previous role, I was responsible for hands-on technical expertise on overall architecture, technical design, configuration, implementation, and production support activities of the SAP BI/BW and NATIVE HANA technology.

Please consider my qualifications and experience:

- Strong hands-on ABAP or SQL Scripts skills and experience is highly desirable
- Experience in SAP BO, including development and support with at least 3 end to end implementations
- Strong knowledge of relational database applications (SQL Server) and OLAP based solutions (Microsoft SSAS)
- Previous experience in retail industry preferred
- Hands-on experience with SAP HANA data modeling, schema management, content import & export, data provisioning technology including SAP LT Replication Server, Data Services and Smart Data Integration (SDI)
- Lead large S4HANA greenfield projects in a role of Data and Analytics Lead
- Deployment and technology enablement of Enterprise Data Strategy for SAP S/4 HANA
- Partner closely with business team to understand Reporting requirements and to ensure the master data will support the defined business KPIs

Thank you for your time and consideration.

Sincerely,

Sawyer Hudson
