

SAP Business Intelligence Cover Letter

568 Gibson Centers Nicolettemouth, AR 76667-4104

Dear Shae Kivalis,

I submit this application to express my sincere interest in the SAP business intelligence position.

Previously, I was responsible for consultancy, supportive services for SAP FI and CO modules.

Please consider my experience and qualifications for this position:

- Attention to details – quick learner
- Managing, coaching and guiding teams in project delivery and professional development
- Designing and facilitating requirements elicitation sessions, including the use of interview, document analysis, workshops, surveys, business process outcome modeling, user centric design and task and workflow analysis
- Determining appropriate requirements, capture and management methods including use cases, user stories, customer journeys and storyboards
- In full life-cycle solution delivery projects of more than 15 people and longer than 6 months
- Working in either Waterfall or Lean/Agile delivery environment
- Collaborating with executive, director or senior manager level professionals in Lean process improvement efforts liaising between business units, technology teams and support teams to drive business outcomes
- Working with SAP BW Data warehouse design changes to new and existing models

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Zion Balistreri
