

SAP Business Intelligence Cover Letter

814 Williamson RadialMcCulloughshire, PA 35671-8206

Dear Casey Satterfield,

I submit this application to express my sincere interest in the SAP business intelligence position.

In my previous role, I was responsible for global support for assigned SAP modules (FI / CO).

My experience is an excellent fit for the list of requirements in this job:

- Technology owner of the enterprise data management and analytics implementation across all functional areas
- Work closely with business process leads with shared responsibility to define/manage the scope of Data and Analytics Workstream (Reporting requirements, Data extraction, cleansing, transformation, mapping, load)
- Ensure cross-functional coordination for end-to-end requirements for all workstreams
- Collaborate with IT Vendor and getting task done
- Expert knowledge of Master Data Governance Strategies
- Expert level Knowledge of Financial reporting and Data
- Hands on experience in multiple Data related activities like extraction, transformation and loading
- Expert level knowledge of BW4HANA and native S/4 HANA reporting

Thank you for considering me to become a member of your team.

Sincerely,

Sutton Hand
