SAP Security Analyst Cover Letter

959 Grant KeyPort Jenine, MN 44508

Dear Ryan Pagac,

I submit this application to express my sincere interest in the SAP security analyst position.

Previously, I was responsible for support with strategy and roadmap for our SAP Solution Manager and general SAP application lifecycle management (ALM).

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Participate in weekend or after-hours work to support critical security specific business initiatives
- Review the understanding documents as prepared by the Product Specialist
- Post signoff on the understanding document by the client, review test scenarios as prepared by the team to ensure coverage of requirements of all critical functionalities of the product tested
- Recommend solution accelerators which can be used with the current product which is implemented and conduct feasibility study for that particular phase
- Review/clarify(wherever applicable) the issues raised by Product analysts/Product Specialist
- Prioritize and identify the business critical requirements based on the understanding of business
- Operational Support for SAP user administration (R3, Hana)
- Salesforce Security

I really appreciate you taking the time to review my application for the position of SAP security analyst.

Sincerely,

Parker Wuckert
