SAP Security Analyst Cover Letter

896 Berge IslandsThurmanmouth, SC 32960

Dear Shae Wehner,

Please consider me for the SAP security analyst opportunity. I am including my resume that lists my qualifications and experience.

In the previous role, I was responsible for ongoing maintenance of multiple SAP landscapes using experience in working with SAP Business Suite Modules (specifically ECC and SRM) & two or more of the following: Solution Manager, SAP BI/Business Objects, SAP Portals, SAP Process Integration, or GRC.

Please consider my experience and qualifications for this position:

- Proactively identify and resolve SAP and GRC (Governance, Risk, & Controls) security issues
- Updates risk matrix, compensation controls, or maintains user authorizations for system components
- Work with business users to resolve SAP GRC workflow related issues or SAP Security Authorization issues
- Work with process team to prototype business security and GRC solutions that meet business needs
- Participate in project work when activating new SAP functionality or implementing new modules to define security requirements based on process designs, design solutions, participate in testing and defect resolutions, and then prepare updated documentation and training materials
- Security, recovery, audit and control methods
- Information security-related problem and incident management
- SOX, Payment Card Industry Data Security Standard (PCI)

Thank you for taking your time to review my application.

Sincerely,

Jordan Schamberger
