

Satellite Technician Cover Letter

455 Cronin UnderpassWallybury, HI 11066-6763

Dear Riley Windler,

In response to your job posting for satellite technician, I am including this letter and my resume for your review.

Previously, I was responsible for knowledge of web server software and relational databases.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- In-depth knowledge of data communications, traffic and/or software applications within area of IT Operations
- Knowledge of network equipment and operations or designed applications within area of IT Operations
- Excellent problem solving, resolution and customer service skills
- Strong PC Desktop/Laptop software and hardware installation and troubleshooting skills
- Working knowledge of desktop PC imaging tools
- Currently possess a U.S. Passport before assignment if U.S. citizen
- Possess and maintain a Secret Security Clearance
- Extensive knowledge of Information Technology, including, but not limited to, communication, hardware and software maintenance, installation, security and configuration

Thank you for considering me to become a member of your team.

Sincerely,

Emerson Hand
