

Security Software Cover Letter

929 Ruecker HillsLehnerhaven, VA 06912

Dear Ryan Wunsch,

I would like to submit my application for the security software opening. Please accept this letter and the attached resume.

In my previous role, I was responsible for specific input to the software components of system design, to include hardware/software trade offs, software reuse, and COTS/GOTS in place of new development.

Please consider my experience and qualifications for this position:

- Able to read and debug Java code
- Experience practicing security in a startup/high-paced environment
- Presented in the past? Let us know!
- Develop and execute security plans
- Engage in hands-on, in-depth analysis, review, and design of the software, including technical review and analysis of source code with a security perspective
- Guide SS&C software development teams through the Security Development Lifecycle (SDL) by participating in design reviews, threat modeling, and in-depth security penetration testing of code and systems
- Perform regular maintenance and refactoring of existing code
- Trouble shoot and diagnose software problems, and provide solutions

Thank you for considering me to become a member of your team.

Sincerely,

Tyler Gerhold
