

Security Software Cover Letter

8132 Altenwerth LoopNorth Dinorah, ID 35447-4895

Dear Ryan Fay,

Please consider me for the security software opportunity. I am including my resume that lists my qualifications and experience.

Previously, I was responsible for design guidance during the development of Information Assurance systems to ensure secure and efficient implementation or algorithms and techniques.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Turn product requirements into concrete design specifications
- Collaborate with the Customer Support team to assist in troubleshooting field issues
- Work with cross-functional teams in an Agile environment
- Knowledge of secure software engineering and best practices
- Basic experience working with a broad range of Java technologies (e.g., JMS, JNI, JDBC, ...)
- Basic experience working with GIT
- Basic experience working with Rational Team Concert
- Basic development experience working with relational databases

Thank you for taking your time to review my application.

Sincerely,

Indigo Turner
