

# Security Software Cover Letter

287 Brakus LocksNew Myron, MI 19960-9021

**Dear Greer Hintz,**

Please consider me for the security software opportunity. I am including my resume that lists my qualifications and experience.

Previously, I was responsible for operational support to the end users, responding to operational issues, due to software and hardware anomalies, troubleshooting, restoring nominal operations, and documenting any software development changes required.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Professional certifications such as CISSP and CSSLP
- Deep working knowledge of fundamental Computer Science primitives and data structures
- Experience working with large distributed applications on heterogeneous platforms
- Deep technical understanding of modern development platforms and languages including Python, Ruby, .NET/PowerShell, Java/Javascript, CD/CI, Git/Gerrit, Dockers, OpenStack, AWS, Azure, and Google Cloud platforms
- No limitation for the oversea work
- High selfresponsibility and proactive thinking
- Strong hands on coding experience, in C/C++, Java, Go or Python
- At least 1-2 R&D/development background

**Thank you for taking your time to review my application.**

Sincerely,

Skyler Schultz
