

Security Software Cover Letter

6030 Luetttgen HighwayEast Bambi, WI 04422-8320

Dear Briar Stark,

In response to your job posting for security software, I am including this letter and my resume for your review.

In my previous role, I was responsible for original solutions to strategic planning, development and operational challenges for DevOps and operational hardware, software, hardware, and systems assets.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Basic experience working with security log analysis, application log analysis, and general log management best practices
- Proven track record of delivering security capabilities for software systems
- Working Experience with Java, JavaScript, C/C++, Python or Perl
- Experience with test automation, continuous integration, DevOps
- Good working knowledge of Virtualisation technologies such as VMware, ESXi
- Proficient in software development with experience in C++, C#, Linux and SQL
- Risk and threats analysis of security systems
- End-to-end security architecture

Thank you for taking your time to review my application.

Sincerely,

Jordan Conn
