

Security Software Cover Letter

5320 Hartmann GreensVeumtown, AR 37790-7367

Dear Emery Dickinson,

I would like to submit my application for the security software opening. Please accept this letter and the attached resume.

In my previous role, I was responsible for innovative solutions to strategic planning, development and operational challenges for DevOps and operational hardware, software, hardware, and systems assets.

Please consider my experience and qualifications for this position:

- Root cause analysis of security defects and creation of counter measures
- Expertise in network security protocols (especially TLS but also IPsec/MACsec), network protocols for the IoT and embedded systems
- Experience with DISA STIG Policy and Implementation
- Knowledge of identity systems, authentication/authorization techniques and standards, web application firewalls, intrusion prevention/detection systems, content filtering, secure log management, security information, event management systems, anti-malware solutions, software license management systems, cloud orchestration, and endpoint security solutions
- Knowledge of technology methodologies – microservices, service oriented architecture, software & hardware development practices, operational practices, web services design, database design and data management
- Experience with static code analysis tools like Fortify and Veracode
- Experience with network monitoring tools like Wireshark and TCPDUMP
- Experience analyzing vulnerabilities

Thank you for taking your time to review my application.

Sincerely,

Oakley Fadel
