

Senior Automation Engineer Cover Letter

16030 Yanira Mountain Gradyshire, GA 92738

Dear Briar Heaney,

I submit this application to express my sincere interest in the senior automation engineer position.

In my previous role, I was responsible for direct support to field operations on PLC, RTU, and HMI based automation systems.

Please consider my qualifications and experience:

- BA of engineer/science and advanced technical degrees is preferred
- Extensive experience & expertise of process development and over sea CM transfer with successful track record
- Excellent performance and time management
- Experience in Continuous Integration for test automation with Jenkins is a +
- Expertise with Selenium/WebDriver
- Experience with CAN communications
- Advanced programming experience in C or C++ model based software development in a pre-emptive multitasking real-time operating system environment
- In-depth knowledge of existing vehicle electrical and software components and associated interfaces

Thank you for your time and consideration.

Sincerely,

Hayden Beer
