Senior Automation Engineer Cover Letter

81388 Wolf PassageJonchester, SD 08931

Dear Justice Metz,

In response to your job posting for senior automation engineer, I am including this letter and my resume for your review.

Previously, I was responsible for engineering support for Surface Quality Monitoring (SQM) Systems, Marker systems, and other critical automated inspection devices within Davenport and Satellites.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Proven expertise with Python
- Experience with Puppet, Ansible and Jenkins
- Experience with Redhat and Windows
- Self-starting, pro-active and organized, being capable of long-term thinking
- Passion for scaling systems and software
- SELinux knowledge
- Familiarity with Git DVCS and Github
- Experience with test management tools (JIRA, Testrail,) and source code management (SCM) tools (Subversion, Git, Jenkins)

Thank you for taking your time to review my application.

Sincerely,

Sam Bailey
