Senior Full Stack Developer Cover Letter

947 Kulas HavenKozeyville, LA 80732-7725

Dear Alexis Mayert,

I would like to submit my application for the senior full stack developer opening. Please accept this letter and the attached resume.

In my previous role, I was responsible for support for line of business and team colleagues on your software components for integration in their solutions.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Conoscenza delle metriche di qualità del codice e di tool e metodologie di Continuous Integration
- Experience developing enterprise data driven applications in Java, Scala, or Go, with technologies including Hibernate, Spring, Maven and JUnit
- Experience developing AWS cloud computing applications based big data analytics platform and enterprise web application that integrates containerized stacks with AWS tools using Spark's, Scala and Java APIs
- Experience developing Web services (RESTful & Python APIs)
- Communicate business and technical ideas to varied audiences including customers, peer engineers, and senior leadership
- Strong ownership, urgency, and drive to launch services and numerous experiences scaling proof of concept code into production
- Lead projects and teams within a fast paced environment
- Proficient in native JavaScript, Angular 2

I really appreciate you taking the time to review my application for the position of senior full stack developer.

Sincerely,

Skyler Schaden
