Dear Spencer Schuster,

In response to your job posting for senior full stack developer, I am including this letter and my resume for your review.

In the previous role, I was responsible for technical guidance and execute on architectural patterns in collaboration with senior architects to application developers, participate in refinement sessions, and apply software design fundamentals to the chosen technology platform.

My experience is an excellent fit for the list of requirements in this job:

- Adherence to the processes for software development, documentation, configuration management, version control, testing
- Should have a good idea across different platform, both frontend and backend
- Understands, utilizes, and leverages frameworks and libraries in Javascript on NodeJS, and in browser side rendering
- Understanding and leveraging of Java platforms like Tomcat and running Java inside of a Docker container
- Experience with SOA, web services (REST, WSDL, SOAP,) or micro-services architecture
- Start-up experience (wears all hats)
- Eager to work on the full stack
- Proficient understanding of web markup, including HTML5, Twitter Bootstrap, CSS3

Thank you for taking your time to review my application.

Sincerely,

Emerson Maggio
