Senior Full Stack Developer Cover Letter

531 Ezequiel RoadWest Kenny, UT 46127-2617

Dear Briar Hermiston,

I submit this application to express my sincere interest in the senior full stack developer position.

In my previous role, I was responsible for customer-focused solutions, and builds and maintains effective customer relationships through timely follow-ups and efficient, effective feedback.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Understanding of various software/application development methodologies with working knowledge of Agile development
- Expert level and hands on experience with JavaScript, AngularJS, Angular2/4 Knockout JS, HTML5, jQuery, XML, CSS, bootstrap and SAAS
- Experience web service development, SOAP, REST, JMS and similar technologies
- Excellent overall mobility expertise, particularly on Worklight (MobileFirst), native/hybrid app development, push notification, creating adapters, offline storage, Cordova integration
- Web application development experience preferred in IBM technology stack – Message Broker, Message Queue, WebSphere, DataPower, ISAM
- Experience with Unit testing frameworks (Junit, Mockito, Jasmine and Karma or similar)
- Experience in CI, Jenkins, Jira, Crucible, SVN, Git and other development support tools
- Good to have IBM Message Broker, and IBM DataPower

Thank you for considering me to become a member of your team.

Sincerely,
