

Senior Instock Manager Cover Letter

78191 Upton UnionMarcellafort, PA 12034-5613

Dear Morgan Gutmann,

I submit this application to express my sincere interest in the senior instock manager position.

Previously, I was responsible for assessment of category supply market conditions and to help address issues and challenges associated with the organization's supply chain.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience at a top-tier management consulting, internet or e-commerce company, or investment bank
- Leads new features and systems implementations
- Proven excellent business judgment, strong written and oral communication skills, and a practical, common sense approach to getting things done
- Proven track record of managing and executing large projects from concept to completion, including project management, data gathering and modeling, problem solving, and communicating recommendations
- Strong verbal communication skills where statements are high-impact, relevantly pitched for the audience, and frugal on time
- Familiarity conversing with, and the work style of, technical development teams
- Proven analytical skills and highly numerate, including proficiency in Excel and data query/extraction such as SQL
- In-stock, operational buying or supply chain excellence experience at a senior level ideally in an e-commerce, retail, key account management or in a major consultancy firm

Thank you in advance for taking the time to read my cover letter and to review my resume.

Emerson Wyman
