

# Senior Maintenance Manager Cover Letter

7970 Littel Plaza  
Freemanshire, WY 25612

**Dear Skyler Lind,**

In response to your job posting for senior maintenance manager, I am including this letter and my resume for your review.

Previously, I was responsible for troubleshooting and repair support to the production areas within the Sherman Plant to include all production machines, assembly test equipment, equipment assigned to the building such as the boiler, high volume air compressors, cooling towers, HVAC system, building plumbing, building electrical and the facilities.

My experience is an excellent fit for the list of requirements in this job:

- Managing large sized geographically distributed teams
- Knowledge of supply chain business processes, understanding of Invoicing processes is a benefit
- Experience with Building Management software strongly preferred
- Comfortable writing department operational/maintenance SOP's
- Willingness to put internal customer needs first
- Hands on experience of Maintenance Systems CMMS (most preferable IBM Maximo)
- Excellent Project Management skills (maintenance)
- Strong communicator in different organization levels in multicultural environment

**Thank you for your time and consideration.**

Sincerely,

Casey Sauer
