

# Senior .NET Cover Letter

43361 Marvin IslandsLake Delora, UT 24490

**Dear Corey Bradtke,**

In response to your job posting for senior .NET, I am including this letter and my resume for your review.

Previously, I was responsible for recommendations on complex process design scenarios using common process design patterns and parent workflows to establish a framework around logging, security and high level routing.

Please consider my qualifications and experience:

- Readiness to learn complex data flows and Risk/PNL calculations of financial instruments
- Readiness to work in multisite team with occasional travels
- Working knowledge of JQuery, LINQ, and MVC
- Experience in SQL/ DB2 (stored procedures, UDFs, views)
- Experience in integrating with Messaging & Queue-ing Middleware (specifically IBM MQ)
- Should have strong documentation skills and strong understanding of Software Development Lifecycle best practices
- Setting up continuous build and deployment environments using Jenkins, TFS, Bamboo
- NET framework utilizing C#.NET and JavaScript

**Thank you for your time and consideration.**

Sincerely,

Armani Bins
