Senior Network Administrator Cover Letter

5995 Kareem VillePort Mackchester, WV 72561-1453

Dear Cameron Boehm,

I submit this application to express my sincere interest in the senior network administrator position.

Previously, I was responsible for design, engineering and architectural support to manage the network infrastructure including technical requirements, analysis, design and implementation of WAN, LAN, WLAN, SD-WAN, SDN and VoIP.

My experience is an excellent fit for the list of requirements in this job:

- Knowledge of storage protocols, including iSCSI, NFS, FC, and FCoE
- Teamwork – Enjoys working as a member of a team, is an active participant in forming positive relationships
- Being part of the problem management and completing root cause analysis for the identified incident
- Knowledge of IT infrastructure (operating systems, directory services, importance of systems redundancy)
- Expertise with Secure E-Commerce environments and Security Infrastructures
- Demonstrated expertise in the area of network technology infrastructure (switching, routing, protocols, firewalls, VPN's, WAN architectures, Load-balancing and DNS, Wireless
- Authentication and management systems, VoIP, Video, programming/scripting)
- A minimum of 3yrs' experience with VM Ware and it's derivatives (VSAN, NSX, VRealize)

Thank you for considering me to become a member of your team.

Sincerely,

Robin Brown
